Beam It Up!
— A Classification Grid for Historic and Contemporary Practices of Beaming by Mathematical Re-Modelling

Markus Lepper[1] Baltasar Trancón y Widemann [1 2]

[1] <semantics/> gGmbH, Berlin post@markuslepper.eu

[2] Nordakademie Elmshorn

Tenor 2023, Boston, May 17 2023

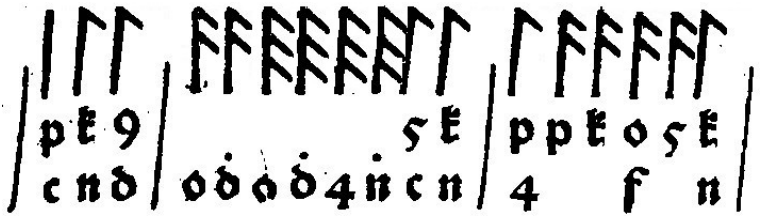
1. **Context**
   - Genesis of the earliest beams
   - Sort it out by mathematical re-modelling

2. **Evaluation Pipeline for Beams**
   - Overview
   - Metric Tree Spec and Rhythms
   - Additional External Parameters
   - Pitches and Vertical Positions
   - Bypass a): Modified Genuine Beams

1 Context
- Genesis of the earliest beams
- Sort it out by mathematical re-modelling

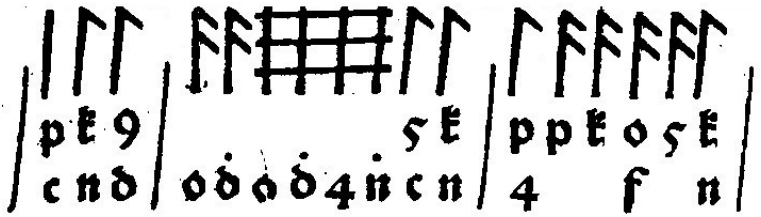
2 Evaluation Pipeline for Beams
- Overview
- Metric Tree Spec and Rhythms
- Additional External Parameters
- Pitches and Vertical Positions
- Bypass a): Modified Genuine Beams

Genesis of the earliest beams:



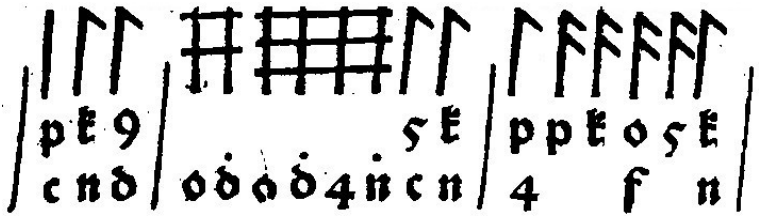
(*Hans Neusidler: Ein Newgeordent Künstlich Lautenbuch* (Nuremberg, 1536), urn:nbn:de:bvb:12-bsb00041542-7)
"Leiterlein" = "little ladder"

Genesis of the earliest beams:



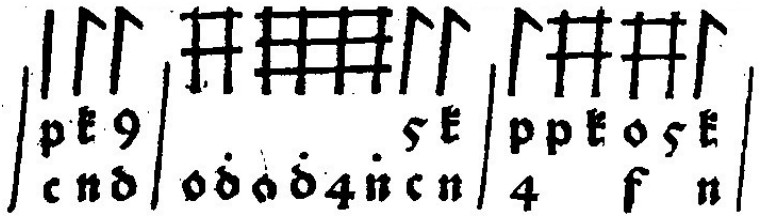
(*Hans Neusidler: Ein Newgeordent Künstlich Lautenbuch* (Nuremberg, 1536), urn:nbn:de:bvb:12-bsb00041542-7)
"Leiterlein" = "little ladder"

Genesis of the earliest beams:



(*Hans Neusidler: Ein Newgeordent Künstlich Lautenbuch* (Nuremberg, 1536), urn:nbn:de:bvb:12-bsb00041542-7)
"Leiterlein" = "little ladder"

Genesis of the earliest beams:

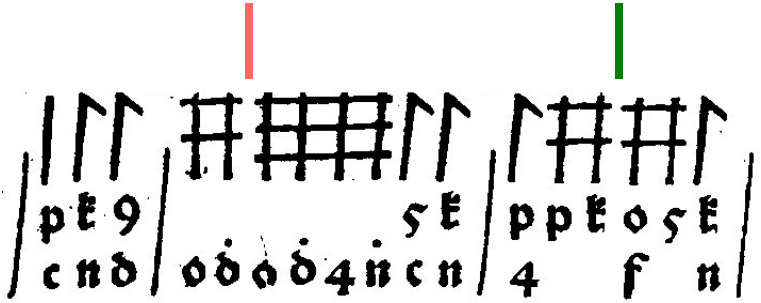


(*Hans Neusidler: Ein Newgeordent Künstlich Lautenbuch* (Nuremberg, 1536), urn:nbn:de:bvb:12-bsb00041542-7)
"Leiterlein" = "little ladder"

Genesis of the earliest beams:

(*Hans Neusidler: Ein Newgeordent Künstlich Lautenbuch* (Nuremberg, 1536), urn:nbn:de:bvb:12-bsb00041542-7)
"Leiterlein" = "little ladder"

Genesis of the earliest beams:



(*Hans Neusidler: Ein Newgeordent Künstlich Lautenbuch* (Nuremberg, 1536), urn:nbn:de:bvb:12-bsb00041542-7)
"Leiterlein" = "little ladder"

Sorting it out by mathematical re-modelling

Mathematical re-modelling =

- Build a mathematical model which mimicks the symbol system defined by culture / history

Sorting it out by mathematical re-modelling

Mathematical re-modelling =

- Build a mathematical model which mimicks the symbol system defined by culture / history
- Build *variants* / *families* of models, identified by *parameter settings*

Sorting it out by mathematical re-modelling

Mathematical re-modelling =

- Build a mathematical model which mimicks the symbol system defined by culture / history
- Build *variants* / *families* of models, identified by *parameter settings*
- With **no claim** for explanation, historic truth, adequateness,
  but as **an offer** to domain experts for more precision in nomenclature.

names and types of parameters:

nota.trabes.cauda.minInterior : $\mathbb{Q}_{\geq 0}$

nota.trabes.cauda.min : $\mathbb{Q}_{\geq 0}$

$\Longrightarrow$ model properties

de Linguis Musicam Notare (LMN)

- Complete theory of musical notation
  restricted to *conventional use of CWN*
- 834 properties (= modules and their parameters)
- 700 pages
- **open and extensible**
  by "Z" refinement mechanism and hierarchical nomenclature
- These results on beams are such an extension to LMN: about 60 properties

1. Context
   - Genesis of the earliest beams
   - Sort it out by mathematical re-modelling

2. **Evaluation Pipeline for Beams**
   - Overview
   - Metric Tree Spec and Rhythms
   - Additional External Parameters
   - Pitches and Vertical Positions
   - Bypass a): Modified Genuine Beams
